# Jie Peng

 $\square$  jie.peng1004@gmail.com

𝚱 https://jiepeng104.github.io/

## Education

#### Harbin Institute of Technology

Bachelor of Engineering in Computer Science and Information Security

- Score: 89.32/100
- Coursework: Set Theory and Graph Theory (93/100), Computer System (94/100), Introduction to machine learning (93/100), Cryptography Theory and Practice (96/100), Information Content Security (95/100)

## Harbin Institute of Technology

Master of Engineering in Computer Security

- Score: 89.10/100
- Advisors: Prof. Hui He and Prof. Weizhe Zhang
- **Coursework:** Combinatorial Optimization and Convex Optimization (97/100), Data Mining: Algorithms and Applications (98/100), Network and Information Security (94/100)

## Publications

- Jie Peng, Hongwei Yang, Jing Zhao, Hengji Dong, Hui He, Weizhe Zhang and Haoyu He. "Circumventing Backdoor Space via Weight Symmetry". (ICML 2025 Z , arXiv Z)
- Jie Peng, Hongwei Yang, Hui He, Jing Zhao, Haoyu He, Hengji Dong and Weizhe Zhang. "LS<sup>2</sup>: Boosting Hidden Separation for Backdoor Defense with Learning Speed-driven Label Smoothing". (<u>Under Review</u>, <u>PDF</u> ∠)
- Jing Zhao, Hongwei Yang, Hui He, Jie Peng, Weizhe Zhang, Jiangqun Ni, Arun Kumar Sangaiah, and Aniello Castiglione. "Backdoor Two-Stream Video Models on Federated Learning". ACM Transactions on Multimedia Computing, Communications, and Applications (TOMM Z)

## Awards and Honors

**Runner-up** , The 7th Qiangwang International Elite Challenge on Cyber Mimic Defense (AI Track), 2024 (Team: HiddenFace)  $\blacksquare$ 

◦ Developed adversarial attacks on face recognition systems without requiring attacker-specific model retraining, enhancing attack transferability and robustness under mimic defense scenarios. (Code ☑)

## **Industry Experience**

State Key Laboratory of Communication Content Cognition (Beijing)	April 2023 - Sept 2023
---	------------------------

- $\circ~$  Developed back-end services using Spring Boot and MyBatis for a social medial analytics platform, enhancing data processing capabilities.
- $\circ\,$  Created a web crawler for Twitter using Selenium, collecting over one million data points and user information to train machine learning models, increasing data volume by 50%.
- Tools Used: Java, Python, Selenium

## **Additional Information**

Skilled at: C, Java, Python, SQL,  $LAT_EX$ 

Languages: Mandarin (native), English (Proficient, IELTS band score 7)

Sept 2018 - June 2022

Sept 2022 - June 2025
